- You are allowed to change the template according to your wishes.

### How can I edit the css file?

You can find the css file in the directory `/assets/theme/css` and then open the file `style.css`

### I want to add a page, but I don't know how to do it.

You can contact me on Discord, I will help you there.

Support Discord Server: <https://discord.gg/gDct7m5cnc>

### How can I upload my page?

..... You need a **web server**. You have to buy it from a hosting company. But there are also free alternatives. You can also use your **nginx** or **apache** webserver on your own server. You just have to upload the files in the folder to your webserver.
